GitHub, Demo

## EXPERIENCE

### ODIN AI | MAY 2023 - PRESENT, REMOTE

- Integrated Google Chat API with Odin Abilities, published on the Google Marketplace.
- Led end-to-end Odin integration with Microsoft Teams using the Bot Framework for enhanced collaboration.
- Integrated Claude LLM into the backend infrastructure, optimizing system performance.
- Implemented Meeting Notetaker Settings functionality, leveraging GPT models for efficient summarization.
- Authored Docker files for the ECS environment, enhancing load testing and scalability.
- Executed codebase refactoring with FastAPI base models, significantly improving maintainability.
- Implemented New Relic APM, ensuring proactive issue resolution with alert email notifications.
- Drove development of critical endpoints (Filter Meetings, User Feedback, Project Member Addition), ensuring seamless frontend integration.
- Integrated and optimized the RQScheduler flow for automatic bot removal, streamlining system efficiency.
- Contributed to the support team for a month, effectively managing support tickets.
- Collaborated with the marketing team to deliver impactful marketing emails using SendGrid integration.

### MSOFT TEXAS CONSULTANCY | Nov 2022 - APRIL 2023, REMOTE

- Implemented subscription feature at <https://tweet-summary.herokuapp.com/subscribe/>, allowing users to subscribe to specific search topics.
- Utilized Celery task workers and Beat scheduler, integrated with Redis, for seamless Twitter data retrieval.
- Employed SendGrid for automated email notifications with relevant results sent to users every midnight.
- Configured GoDaddy domains to Heroku apps, ensuring seamless and secure connection.
